Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Spacey (U.S. Patent Publication 2002/0038371). For clarification of what HTTPS is please referrer to additional references cited.

For claim 1, Spacey teaches, a network device for managing a communication over a network, comprising:

a transceiver arranged to send and to receive the communication over the network; (Spacey, paragraph 16, VPN)

a processor, coupled to the transceiver, that is configured to perform actions, including: receiving a proxy request from a client through a secure tunnel; (Spacey, paragraph 16, VPN)

modifying the proxy request to include a security attribute; (Spacey, paragraphs 122-123, SSL)

and forwarding the modified proxy request to a proxy service, wherein the security attribute enables a proxy connection through the secure tunnel. (Spacey, paragraph 123, SSL send)

Application/Control Number: 10/748,845

Art Unit: 2145

For claim 2, Spacey teaches, the network device of claim 1, wherein modifying the proxy request further comprises including a security header with the proxy request. (Spacey, paragraph 73, 123, SSL)

For claim 3, Spacey teaches, the network device of claim 1, wherein the security attribute further comprises at least one of an IP address associated with the client, a security

property associated with the secure tunnel, a public key certificate, a security credential associated with the client, access control data configured to enable the client access to a content server, a session identifier, and an identifier associated with the secure tunnel. (Spacey, paragraph 114, 117, key)

For claim 4, Spacey teaches, the network device of claim 1, wherein the proxy request is an HTTP proxy request. (Spacey, paragraph 95, HTTP)

For claim 5, Spacey teaches, the network device of claim 1, wherein the secure tunnel further comprises at least one of an SSL tunnel, a TLS tunnel, HTTP Secure (HTTPS), Tunneling TLS (TTLS), and an EAP secure tunnel. (Spacey, paragraph 123, SSL)

For claim 6, Spacey teaches, the network device of claim 1, further comprising receiving an HTTPS communication to enable the secure tunnel. (Spacey, paragraph 123, SSL)

Claims 7-28 list all the same elements of claims 1-6, addressing the same invention.

Therefore, the supporting rationale of the rejection to claims 1-6 applies equally as well to claims 7-28.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached Notice of references cited (if appropriate).
